este libro constituye la obra póstuma de colin rowe uno de los

historiadores y críticos de arquitectura más destacados de la segunda mitad del siglo xx en él se plasman sus enseñanzas sobre uno de los periodos históricos que siempre le fascinó el cinquecento el siglo xvi italiano el origen de los textos son sus legendarias clases sobre la arquitectura del renacimiento que impartió durante 28 años en la universidad de cornell de las cuales pronto empezaron a circular apuntes entre los estudiantes esas lecciones se distinguían de las de sus colegas por el énfasis puesto en la perspectiva y la re presentación de la arquitectura en la pintura y la escultura y también por la preeminencia otorgada al siglo xvi los apuntes de esas clases tomados por su antiguo alumno leon satkowski sirvieron para preparar el contenido de este libro la muerte de rowe en 1999 impidió completar los textos que ambos llevaban preparando desde 1994 tras lo cual se decidió publicar únicamente los capítulos ya terminados estos estudios constituyen un homenaje a los edificios y los artistas por los que rowe sentía un profundo aprecio con ese atractivo estilo que siempre caracterizó sus escritos rowe expone sus análisis en términos tanto históricos como contemporáneos y centra su atención tanto en los principales arquitectos de la época bramante giulio romano o sansovino como en sus mecenas los papas la familia medici o los dux de venecia sin olvidarse de las ciudades que acogieron sus obras roma venecia o mantua para quienes viajen a italia para disfrutar del arte y la arquitectura del siglo xvi esos lugares que cautivaban el corazón de rowe y estimulaban su fértil imaginación este libro será una placentera lectura en la medida en que constituye un valioso compendio de erudición crítica

los ensayos que conforman este libro se concentran en el problema de la experiencia de la arquitectura en el proyecto y el objeto arquitectónico y constituyen un esfuerzo por establecer un diálogo significativo entre la reflexión teórica y la práctica de la arquitectura mediante la confluencia de diferentes disciplinas y áreas de conocimiento la historiografía la teoría y la crítica de la arquitectura como también la estética la filosofía y la arquitectura esta confluencia permite enfrentar prejuicios como el de la escisión entre reflexión teórica y práctica artística el carácter inútil o en el mejor de los casos de ilustración cultural de la reflexión teórica para la práctica arquitectónica el carácter básicamente de oficio de esta última o el distanciamiento entre la naturaleza abstracta del proyecto arquitectónico y la naturaleza concreta de lo vivido en los espacios arquitectónicos aunque el fenómeno arquitectónico presupone casi siempre el objeto arquitectónico construido no se reduce a él y obliga a ampliar la perspectiva de análisis a la del proyecto arquitectónico la perspectiva del proyecto

arquitectónico presupuesta implica no solamente las dimensiones técnicas formales y conceptuales relativas al objeto arquitectónico sino además las instancias políticas sociales culturales estéticas y económicas como teóricas críticas e historiográficas respecto a las cuales este objeto es tanto efecto como agente se trata entonces de una noción ampliada de proyecto arquitectónico que aunque implica el problema convencional de la proyectación de edificios supera la noción convencional del proyecto arquitectónico

en este libro publicado por primera vez en 1973 christian norberg schulz describe la historia de la arquitectura occidental como una historia de formas significativas en base a esta perspectiva que remite a la filosofía existencialista y a la fenomenología el autor analiza las principales etapas y los edificios mas importantes en la historia de la arquitectura desde el antiguo egipto hasta nuestros dias las construcciones de los diversos periodos culturales son descritas como una expresion de valores religiosos y filosoficos prevalentes el analisis meticuloso del origen significativo de los ejemplos de cada epoca permite superar una vision puramente estilistica de la historia de la arquitectura y reconciliarla con la propia evolucion de las preocupaciones humanas

this book presents themes related to contemporary architecture as the results of diverse cultural influences and architectural legacies manifested in a rich variety of styles materials and spatial perceptions it consists of 24 chapters written by authors from various continents and contains the result of research highlighting contemporary architecture in relation to multiple aspects that are distinguished by their eclectic nature characterized by the integration of diverse cultural and architectural influences the book examines aspects involving material aspects technologies design history salvage technologies and digitization the aspects covered are always filtered through research which objectively integrates traditional and innovative approaches thus the focus is to explore the contemporary lexicon not only in the field of architecture and engineering but in all those areas where this theme can be read with a meaningful vision contemporary architecture is constantly evolving reflecting the changing needs of society and anticipating the challenges of the future

27 research papers grouped into 3 sections that range from architectural history to studies of patrimony urban studies and conservation continuation of the editorial project started in 1999 to promote scholarship on architecture in the state of michoacan mexico

the present edition publishes part of the research papers presented during the seminario de investigación arquitectura para la producción organized by the university of michoacán between 2001 and 2002 that included the participation of national and international academics the book gathers 23 collective and individual multidisciplinary works that examine from various perspectives the history of architecture in rural areas works are mainly focused in the colonial territory of the ex bishopry of michoacán divided in 4 main topics space settlements technology and environment and property control and structure

a scholarly well organized history of major trends types and forces in the development of architecture in costa rica from the colonial period through the 20th century

this series was the winner of the american institute of architects prestigious award for excellence in international book publishing each volume in this series is introduced with an essay on the architect and a chronological or stylistic presentation of their most outstanding buildings and projects no other series provides such a complete and concise summary of the world s leading architects works the volumes are fully illustrated in black and white with photos and project renderings
